PROFESSIONAL SUMMARY

Skilled junior programmer with experience in research and education roles. Looking to branch into industry. Well-versed in large language models, Python, web development, security applications, and databases. Currently located in Chicago, but open to relocation and/or virtual work. Native English speaker, fluent in French.

EDUCATION

The University of Chicago

Chicago, IL

Computer Science (BS) w/ Cybersecurity specialization, French (BA)

June 2025 (Expected)

Coursework: Computer Security, Surveillance Aesthetics, Databases, Theory of Algorithms, Ethics in Engineering

Conferences: CHI '25

Accolades: Dean's List 2024

TECHNICAL SKILLS

Programming Languages: Python, HTML/CSS/JS, Arduino, Lua, Java, MySQL, PostgreSQL, Dart

Libraries/Frameworks: Pandas, Tone.js, Flutter, Tkinter, Pygame, p5/p5play

Tools/Platforms: Git, bash, macOS, Linux, Google Suite

PROFESSIONAL EXPERIENCE

iD Tech

Chicago, IL

Virtual Instructor

June 2024 – Present

- **Online Private Lessons** - Tutoring students age 7-19 of all skill levels in solo lessons, guiding project creation. Over 200 lessons taught. Sample demo projects can be viewed on my website.
- **Virtual Tech Camps/Online Teen Academies** - Teaching groups of 2-12 students and providing certifications.

National Oceanic and Atmospheric Administration

Seattle, WA

Machine Learning Intern

June 2022 - August 2022

- **Machine Learning Research** - Investigated proprietary VIAME software, Darknet, and YOLOv7. Led machine learning implementation efforts, educated key stakeholders in the design of popular algorithms, and developed plans for deployment on live dataset.
- **Database Management** - Wrote Python tools to clean up and sort 9,000+ annotation dataset. Wrote extensive documentation regarding Bering-Okhotsk Seal Survey database.

ACADEMIC / RESEARCH EXPERIENCE - UCHICAGO SUPERGROUP

Code-Generating LLMs Research

June 2023 – Present

- Paper accepted to CHI 2025, will be credited as second author.
- Performing inductive qualitative coding of participant responses. Helping to develop participant questions for use in a study investigating end-user programming with LLMs. Analyzing larger trends in human/LLM data.
- Developing experimental procedures for use with human subjects, from question fine-tuning to response processing. Attained IRB certification to work with human subjects.

Passwords With LLMs Research

April 2023 – Present

- Will be credited as an author.
- Performing a literature review of AI approaches for password analysis. Working closely with PhD mentor to draft the related works section of a research paper.
- Performing high-level semantic analysis of passwords in order to determine strength levels of various password-generation techniques.
